

# The Carbon Chronicle

VOLUME 11, NUMBER 25

CARBON, ALBERTA, THURSDAY, JULY 27, 1933

\$2.00 A YEAR IN ADVANCE

## THE WORLD OVER

**PRINCE BUYS NEW AEROPLANE**  
**NORMAN BLOCK LOSS IN \$200,000**  
**MOLLISONS CRASH IN STATES**  
**POST BREAKS RECORD BY 21 HRS**

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon Moth, with a maximum speed of about 150 m.p.h.

It is a biplane, with six armchair seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The armchairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The plane is two-engine with 250 h. p. It is finished like all the Prince's planes, in red and blue of the Household Brigade Flying Club.

Fire destroyed the Norman block in Calgary last Friday, and the structure and contents were almost a total loss. The building, which was located at 123 Eighth Avenue West, was an old landmark in Calgary, having been erected in the early nineties.

A meeting of insurance agents in Calgary placed the loss at between \$200,000 and \$250,000, and insurance to the amount of over \$175,000 was covered by individual concerns.

**BRIDGPORT, Conn.**—Jim and Amy Millison, who set out from Wales with hopes of being the first persons to make non-stop flight from Great Britain to New York, crashed within 60 miles of their goal on Sunday night. After successfully crossing the North Atlantic and speeding down the New England coast, the British hero crashed up after 29 hours in the air. Both Millison and his wife were taken to a hospital where it was declared by authorities that their injuries were not serious.

**NEW YORK**—Wiley Post held a new white-enduring record on Saturday night after soaring across the North American continent in a whirlwind finish to his world flight. The stocky Oklahoma, smiling but on the verge of exhaustion, landed his purple trimmed monoplane at Floyd Bennett Field at 10:59 p.m. after a gruelling 22,000-mile non-stop from Edmonton. His total elapsed time for the 15,000 mile flight was 16 hours, 48 minutes. He shattered by more than 21 hours the time he and Harold Gatty established two years ago.

"How can I get my husband to tell me about his business affairs?" asks a wife.

"Try to get him to buy a new car."

Made by Royal Paragon—Regular \$1.00; Special at..... 89c

## McKIBBIN'S DRUG STORE

A.F. McKIBBIN, PHM. B., Prescription Specialist, CARBON, ALTA.

## Let Us Do Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how many are to pass up the home printer and let the order go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

## The Carbon Chronicle

## STAMPEDE TO BE HELD HERE WED. AUGUST 9

Carbon is to have a stampede this year, and it will be held on Wednesday, August 9th.

The event will commence in the morning at 10 a.m. with a monster parade, for which various prizes will be given. Following this and throughout the rest of the day a full programme of bucking and other events will be carried out.

The posters are now out announcing the event and riders are expected from all parts of the surrounding districts. Andy O'Brien is looking after the event, which will be held at the old stampede grounds east of town, and a real eventful day is promised.

Good cash prizes are being awarded in all events and these should attract top riders.

In the evening a monster old time dance will be held.

Plan to bring your family to town for this attraction. You are assured of your money's worth.

## OTHER CENTRES PUSH FOR GRAVEL ROAD CONNECTIONS

A news report from Edmonton states that some of the mines along the Edmonton branch are prospering as a result of coal orders from Ontario. The report also states that the members for that constituency had introduced Hon. G.L. McPherson, minister of public works, with a request that the Jasper highway be gravelled from Edmonton to Carleton Place. Consideration was promised.

## WORLD NEWS BRIEFS

**CENTRALIA, Wash.**—Bill Clark, a barber, objects to the city ordinance requiring all Centralia citizens to wear whiskers during the annual "Pioneer Days" celebration.

He has filed a claim against the city for \$36, saying the ordinance costs him \$18 weekly in lost shave.

**ESPANOL**—Twenty persons were killed in a sharp earthquake in the village of Toluca, near the city of Mexico, Turkey, last week.

**CHICAGO**—Somebody stole the gallstones from the gallstone exhibit at the World's Fair.

## AN EXPLANATION

Readers will notice that we have crowded advertising on both the front and back pages this week, and we feel that some explanation is due, especially to our advertisers, whom we hope will be lenient with us.

Next Thursday a special edition of The Chronicle comes off the press and at the present time we have nearly all our type metal in the many pages which this issue contains. On the other hand, extra work forces the publisher to cut down on the present issue.

## NO GUARANTEE ON BINDER TWINE THIS YEAR

The provincial government has no intention of entering the binder twine business at present, declared Premier J. E. Brown on Thursday last when asked, "I have said that if the government continues giving guarantees so as to take the risk, we would take over the whole thing as a monopoly. But our present intention is to get out of the guarantee giving business."

## BANK MONTREAL CROP REPORT

July 26th, 1933

In the Prairie Provinces recent showers and cooler weather have been beneficial to the crops, but rains and more favourable growing weather are required until the harvest to prevent further deterioration. Drought damage in the southern and central areas of these provinces is serious and a below-average crop is indicated with a shortage of feed in a number of districts. The grasshopper menace continues in certain areas. In Quebec the weather conditions have been favourable.

Northeastern Alberta—Wheat is 60 per cent to 75 per cent headed at an average height of 15 inches. Coarse grains are average. Pastures and hay crops are high.

Southeastern Alberta—Crops generally are progressing satisfactorily but in the west, wheat is practically all headed. Pasture is fair to good.

Western Alberta—Wheat is a good stand in the northern district and in coarse grains are progressing. Wheat is headed short in the south and poor yields are indicated. Sugar beets are making good progress. Pasture and hay crops are average.

## Carbon Chronicle Special Edition

Next Thursday, August 9th, The Carbon Chronicle will issue a special edition of the paper in commemoration of the twenty-first anniversary of the founding of the Village of Carbon.

The Village was incorporated in 1912 and the growth of the settlement since that time will be fittingly represented by photographs, etc. in the issue of the paper which will be the only one in which the Town will celebrate its coming of age.

Advertisements for this issue have been practically all sent in to this office. Last minute copy will be accepted up till Monday morning, when the papers will go to press.

If you are a business man of town, help celebrate Carbon's birthday by doing your bit towards the issue of Carbon's history in the 12-page birthday anniversary.

## WOODWORTH ELECTED TO HEAD THE C. C. F. PARTY

James Woodworth, veteran labor chief and provisional president since the Federation's formation in Calgary a year ago, was unanimously elected first national chairman of the Co-operative Commonwealth Federation, at the convention being held at Regina.

The tall, bearded labor member of parliament from Winnipeg North Centre was given a rousing reception when he was declared elected after Robert Gallinger and R. J. Garland, had both declined nominations.

**Name to Stand**

After some delegates to the convention had intimated that the name of the Co-operative Commonwealth Federation should be changed to a more definite name, a vote was taken on the question, and it was decided by the delegates that the name should stand as above.

## CARBON PLAYS AT TENNIS WITH HESKETH CLUB

The Carbon Lawn Tennis Club visited at Hesketh on July 22nd, when they played the return match with the Hesketh Tennis Club. The result was a win by Carbon by seven events to love.

The following are the results and scores:

Men's Singles—W. Poxon, Carbon, defeated L. Brown, Hesketh, 6-5, 4-3, 2-6.

Women's Singles—Miss A. Wise, Carbon, defeated Miss J. Heath, Hesketh, 6-1, 6-1.

Men's Doubles—W. Poxon and W. Hawking, Carbon, defeated L. Brown and J. Neilson, Hesketh, 6-3, 6-3.

Women's Doubles—Misses N. Hemmings and A. Wise, Carbon, defeated Mrs. Clark and Miss J. Heath, Hesketh, 6-2, 6-2.

Mixed Doubles—H. Brown and Miss N. Hemmings, Carbon, defeated Mr. J. Bissett and Mrs. L. Brown, Hesketh, 6-2, 6-5.

## Miccadoo Says --

Polliceman—You were doing sixty miles an hour, miss.

Bright Young Thing—Oh, isn't that splendid. I only learnt to drive yesterday.

Lawyer (helping pedestrian up)—"Come with me, my man. You can get someone."

Pedestrian (grocery)—"Heavens, man! I got all the damages I want. Get me some repairs."

Aunt Helen—So you took your first driving lesson today. Did you find it hard, dear?

Woe Neighbour—No, auntie. It's easy enough. All you have to do is keep turning around and without your feet.

Lecturer—Of course you all know what the inside of a corpse is like. Chairman of Meeting (interrupting) Most of us do, but for the benefit of those who have never been inside of one, you might explain it.

Teacher—Here you see the skull of a chimpanzee, a very nice specimen. There are only two in the country—one in the national museum and I have the other one.

It's queer the way a horse eats, isn't it?

What do you mean?

He eats best without a bit in his mouth.

Sandy bought two tickets for a raffle and won a \$1500 car.

His friends rushed up to his house to congratulate him, but found him looking miserable as could be.

Why, man, what's the matter with you?

It's your second ticket. Why I ever bought it I can't imagine.

## RECORD TURNOVER OF STOCKS ON CALGARY EXCHANGE

Last Wednesday's transactions on the Calgary Stock Exchange established a new all-time turnover record of 219,124 shares which exceeded the record of the day before by 162 shares. Not even in 1929 did such a business in stocks take place and the market is going upward.

Crowds jammed the gallery of the exchange and it was almost impossible to move. The floor took on the appearance of the old boom days, as bidding and selling progressed and the business at times was hectic.

## THE CROP SITUATION

The crops in the Carbon district have suffered serious damage the past week from very hot, dry weather. Up until a short time ago the crops were looking out well and a good shower visited the district last Wednesday.

Since that time no moisture has been received.

There are some good crops on some farms in the district and yields on this may run close to 25 bushels to the acre. The stubble, however, is suffering most and yields will be light with short straw.

Cutting of early sown grain will be commenced around August 10th, if dry

weather continues, and it is expected that harvesting will be general by the 20th of the month.

Farmers in the district will be about as far ahead as they were last year, when they had 25 bushels and 25 cent wheat. This year they will have less harvesting expense and with a fair price they will have more ready cash than they did a year ago.

## JUST LOOK AT THE difference THEN CHOOSE

CHOOSE the tube that inflates evenly, without kinking—the tube of uniform thickness because of uniform stretching—the tube with longer life because the rubber on the surface circumference is **uniformly inflated** to an abnormal tension—the tube that is "Circle Built"—the Gutta Percha Rubber Tube.

In addition to the advantage of you of being "Circle Built," Gutta Percha Resisto Inner Tubes are made of heat-resisting black rubber, the only rubber that will successfully withstand high running temperatures. Gutta Percha Roadcraft Tubes are made of the highest quality red rubber.

It costs no more to have the best—buy Gutta Percha "Circle Built" Inner Tubes.

*You will prefer it,*

**Life Means Change.**

Occasionally the writer of this column feels the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which is not out of general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows.

To prepare us for life in a world that is continually changing, that is a very small part of a universe in which nothing is ever to be static even for the space of one brief second, humanity has been taught, from the earliest dawn of reason, to strive for permanence, security, safety, ease, something which we may accept as settled. Thus we find ourselves mentally and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency. Instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to huddle ourselves into a sense of false security, to surround ourselves with an atmosphere of spiritual anaesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we lull ourselves into the belief that we have made of it something really secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experience of the last three uncomely years had we been free from the traditional fear of change. And why should we fear change when it is the most certain thing that life brings us? It is the very essence of life: the vital germ of growth, the stimulus toward achievement, the light of far-off outlook, along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure; makes it worth living to those who have learned to be precious, most helpful of its secrets. Acceptance of this fact is the one royal way to spiritual freedom, and in spiritual freedom lies the only assurance of safety, of permanence, of safety of ease to be found in all the range of created things. For when the spirit is free—free from delusion, free from intellectual fetters, free from fears and traditions and narrow prejudices and selfishness—free to venture where it will and when it will, it is prepared to meet, with profit to itself, the ever unexpected possibilities and adventures of life. The accumulation of these spiritual profits is the one sure laying-up of treasure where neither moth nor rust can corrupt, and where thieves cannot break through and steal. It is the one treasure not subject, except in enhancement, to the vicissitudes of life.

The chief thing in living is life itself. The chief purpose in life is to live it abundantly, joyously, zestfully; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the fullest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely unselfish advantages of life have little if anything to do with material things.

If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanence, we must build upon the certainty of change—constant change both within ourselves and in all other created things; physical, mental and spiritual change. For without change life could not exist. To imagine any possible permanency in life, any static anything, is tantamount to waiting even for the smallest period of our conception of time, would be to imagine our most fearful and hopeless conception of death. And life knows no death, only changes, and continuing life.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but that in our thinking, our planning, our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held loosely and subject to the certainty of change. In other words, we should prepare ourselves for change as the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulations of things spiritual. The insecurity of material accumulations should make us value more highly the security of spiritual accumulations—our experiences, our memories, our generous and friendly impulses, our unselfish and tolerant motives, our whole attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing growth betterment, in short, all that our experience has taught us is most to be desired.

Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present insecurity, fear to venture because of uncertainty, above all else, fear of change. Let us be contently prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

#### Some Birthday Dinner

Peter the Great, third of hispopotamus is 30 years old and lord of the Duchy of Lancaster. His Bronx zoo officials prepared his fourtate in the Garvey Valley of Glamorgan. The upholder gashire, Wales, has let a colliery to was a basketful of mince. In local employment men at the home of lion of soup was served a sheet of \$350 to enable them to chow corn stalks. Entire consisted tain coal for their own households, of two loaves of bread and new quickly it will work four hours. And the piece de resistance was a week in the colliery.

A fence twenty miles long without a head or turn has been completed in Kingsville, Tex., on the boundaries parts of Honduras.

## Summer Complaint Plays Havoc With the Bowels

For people escape an attack of summer complaint, it may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it strikes you how it is going to end. It can run for a day or two and see how weak and prostrate it will leave you. On the last day of an attack of any looseness of the bowels take a few drops of Dr. Fowler's Extract of Wild Sassafras and you will quickly be able to get on your feet. Manufactured only by The T. Millard Co., Limited, Toronto, Ont.

#### Botanists are Interested

Awaiting News Regarding Discovery Of Musk Plants In B.C.

Botanists everywhere are awaiting eagerly news concerning the discovery by Stanley Boys on Texada Island, B.C.

In connection with the reported discovery by Stanley Boys on Texada Island, on the British Columbia Coast, of a musk plant carrying the distinctive odor common over twenty years ago but since unknown, Dr. Arthur W. Hill, director of the Royal Botanic Gardens, Kew, England, is keenly interested.

Dr. Hill has written to Frank Kempe, of the Provincial museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He asks that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The musk of the odor well remembered by most persons of English upbringing—it was common as a pot plant for houses in England a quarter of a century ago—is said to have been taken to England originally from British Columbia by the famous Douglas whose name is perpetuated on our Douglas fir.

It is given as having originated on the American continent by authorities. It had connected it with perfume manufacture years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

#### Home For Orphan Boy

Adopted By Wealthy Couple Whose Dead Son He Resembles

The home of a wealthy silk dyer and such advantages as a college education were ready for a 13-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christopolis, and named after Father Flanagan's picture boys. A picture boy of the lad, an orphan since early childhood, was the medium through which he has become just like a son in the home of Mr. and Mrs. Jean Strongs, who live at Paterson, New Jersey.

It seems that Strongs saw the picture of Peter and was struck by the resemblance of his son, Henry, who was drowned in Great Pond, N.J., a little over a year ago. As a result, arrangements were made to bring Peter in the Strongs household to take the place of the dead boy.

#### Farming On Small Scale

Has Proved Best During These Times Of Depression

Large-scale farming is worth nothing, is no longer being advanced as a cure for the depression. It is not, and so many months since life has been being told that agricultural salvation could only be attained by mass production, very big things, and fears were being expressed that the small farmers would lose their individuality and become something approaching serfs. But the depression has changed all that, as it has changed many other things. The small farmer is managing to get along in some way or other, but the large scale farmers have gone broke or shut up shop.—Brookville Recorder and Times.

#### Prairie Wheat Sales Higher

Show Substantial Increase Over Corresponding Period In 1922

Prairie wheat marketings showed an increase of 2,651,379 bushels over the corresponding period last year for wheat ending Jan. 23, according to Dominion Government figures released today. Total marketings for the crop year to date were 350,742,119 bushels as compared with 250,022,190 a year ago. For Saskatchewan the year's sales were 180,485,567 as compared with 115,863,839.

#### Still Very Much Alive

Sir Murchison Fletcher, High Commissioner for the Western Pacific, who has been visiting London, went to Tonga Island last September to present the Queen with the D.R.E. conferred upon her by King George. He was met on the beach by a tortoise which Captain Cook gave to the Queen's great-great-grandfather in 1773. Sir Murchison stated that the tortoise is very much alive and that he fed it with bananas.

Germany has a "renovize" campaign.

**Powerful Flashlight FREE for POKER HANDS!**

**ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries) Use in the car or in the house and one of the many valuable gifts given in exchange for Turnip Tobacco...**

Bun rippers mellowness... extra satirical flavour. That's the quality you want in cigarette tobacco and that's the quality you get in Turnip Fine Cigarettes. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

#### More Aeroplane Passengers

Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America—and one of them planning to extend across the sea—shows that commercial aviation has increased its passenger income by one-third in recent weeks.

The reason: Renewed activity in general business and loss of what aviation men call "air anxiety" by the public.

The result: A battle for the new business comparable to that of the railroad several decades ago.

In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United Air Lines. American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to complete for business between Chicago and the Pacific Northwest.

At the coast, Northwest will connect with Pan American Airways, which plan to extend the present line to Alaska across the Arctic to Asia. At present, Northwest operates between Chicago and Montana and northward to Winnipeg, Man.

As proof of increasing business the Chicago municipal airport announced that 6,877 passengers were carried out of Chicago on regularly scheduled trips during June, an increase of 100 per cent from a year ago.

Many licensed pilots have obtained employment in the past few months, air line officials announced, because of additional planes placed on schedules.

Trips between Chicago and New York have been doubled by the airlines. A traveller between the two cities now has a choice of more than 20 planes daily, the time of the schedules ranging upward from four and three-quarter hours eastbound to one and half hours westbound.

#### Recovery Program

Plans Formulated In United States To Assist Workmen

With almost 1,000,000 workmen tackling their jobs under the stimulus of higher pay, plans were fashioned by the United States industrial administration to sustain the whole force of public opinion behind the Rooseveltian endeavor to open more jobs and fill additional salary envelopes.

Hugh S. Johnson, industrial administrator, called in his staff of advisors to check over every detail of the preparations for a campaign modeled after the Liberty Loan drives of the Great War days to unite the citizenry behind the recovery efforts. Secretary surrounded the formulation of the plans.

National campaign now in the making would seek even more in demand, purely voluntary wage-raising and hour-cutting action, along the lines of that taken by the steel industry in increasing wages 10 per cent today, without waiting for an executive order by the president.

A strong appeal from President himself might form the centre of the movement. It still was considered that that might, in this, need recommend general hour limits, and advise what minimum wage levels should be.

#### Located Lost Gallions

Pirate Loot Within Grasp Of An English Adventurer

Treasure buried long ago by pirates who stole it in raids on Caribbean shipping is believed to be within the grasp of an expedition led by Stratford D. Jolly, an English adventurer.

Who, with his party, set out from Brixham more than a year ago in a steamed steam trawler. At least, Jolly believes the treasure is within reach. He has returned to England for a short time, but will continue the search in another vessel the trawler having been sold.

One of their party, Frank Cooper, who gave up the post in the glove-manufacturing industry in Yverly to join the expedition as gold diver, was able to locate at Trinidad a number of sunken Spanish galleons, which were scattered in 1797 to avoid capture by the British fleet, according to Jolly's story.

Finding the galleons, he said, was as easy as could be for Cooper, who used for the purpose only a grapple-shovel. "That Cooper's work was successful, we know," said Mr. Jolly, "because we took soundings and were able to trace the actual shape of the sunken ships. They are now in only seven fathoms of water—a depth easy for divers to work in—and, above all, they are in a very sheltered part."

#### Wanted To Look Around

Price George Climbed 180-Foot Scaffolding Before "Big Ben"

Price George demonstrated remarkable nerve before a small crowd of people when he climbed up the scaffolding surrounding Big Ben's tower at the House of Commons. No one looking on knew who was "human fly" was to be seen.

The price had expressed a desire to climb up the ladders from platform to platform until he reached Big Ben, and then have "a good look around." Accompanied by a two men engaged on the scaffolding work, he reached the highest point, a few minutes he climbed over a parapet leading to the gallery where he said that the quarters are installed. The price ascended by means of a long spiral staircase inside the tower.

"Climbing the ladders to this height is not an easy job for one not accustomed to the work," an official said. "But the price got up very quickly, and showed his nerve. He told us that he thoroughly enjoyed the experience." During the 180 feet ascent the price had to climb up steep ladders from which, when glancing down, he could see the houses between him and the ground. In many places the scaffolding upon which he had to walk consisted only of a couple of planks.

#### Busola's New Fast Train

With a new idea for locomotives, H. S. Valmier, an official scientist of the Russian transport commissariat, has invented an exceedingly fast train engine which is called an "aero-train." The preface "aero" is a tribute to the wind, existing because the train does not fly, but the term is intended to describe the engine as the aero-plane type, with propellers. It is stated that the train is stable at a speed of more than 150 miles an hour.

Savers in Japan are transferring their money from postal banks to commercial institutions which now offer a higher interest rate.

#### Ceylon's First Woman Lawyer

Nineteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Avarita Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsi girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at the Maria Grey Training College, London, England, and after she matriculated she read for the Bar in Lincoln's Inn.

I saw her at her home in Hampstead, where she is living with her mother—writes an Evening News representative. She was wearing a native dress of blue and gold.

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now they have been none in my own country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there for a time before going to Colombo."

Miss Mehta said there was no branch of the law in which she took special interest and her practice would be a general one. Her father is a marine superintendent at Colombo, and one of the few Parsis in Ceylon. There are only 200 there, he said, "but there are 100,000 in India."

#### Matter Being Considered

Train Ferry May Be Inaugurated Between England and Sweden

A train ferry between Sweden and Britain may be inaugurated, the present plan materializes. A minimum capital of one-half million kronor already has been subscribed, due to the confidence with which the project is regarded in Britain.

Drawings for the ferry have been made and the boat is estimated to cost \$500,000 kronor and have room for 54 refrigerators, car, 10 freight cars and 430 first-class passengers. The Swedish terminal will be Varberg.

It has been suggested that during the summer months the ferry make an intermediate stop at Copenhagen.

#### Hardly Necessary

With the nations feeling the way they do about each other, what need is there for trains that go 110 miles an hour and airplanes that go 250 miles an hour? Well, the answer is we are perfecting communications in order to get away from each other as fast as we can.

The production of potatoes in Canada in 1922 amounted to 39,416,000 cwt., the smallest yield recorded since 1916.

W. N. U. 204

WORLD HAPPENINGS  
BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than \$10,000, left Jersey on the way to their new owners in Canada and the United States.

During the four weeks ended June 30, Canadian grain exports through New York totalled 2,420,000 bushels, a decline of 2,027,000 bushels from a year ago.

With several thousand men on the waiting list desirous of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Edmonton lists the most air-minded city in Canada, according to Col. George A. Drew, of Toronto, addressing the Empire Club at Winnipeg, Col. Drew said Fort McMurray, north of Edmonton, was the greatest aviation centre in Canada.

There was a very definite pickup in the exports of Canadian agricultural products to the United States in June, the value of the total being \$346,000 compared with \$217,000 in June, 1932, a report of the Dominion Bureau of Statistics said.

The "Royal Scot," crack British railway train now on show at the Chicago Exhibition, will leave for Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinov, Soviet Foreign Commissioner, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

## Parasitological Research

McGill University To Investigate Parasitic Diseases Of Domestic Animals

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an Institute of Helminthology (study of man and intestinal worms) at Macdonald College, McGill University, Montreal, for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Quebec Government. Dr. T. W. M. Cameron, formerly of Edinburgh University, has been appointed director of the institute and work started on April 1, 1932. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the park is under the control of a specially appointed associate committee on Parasitology of the National Research Council, of which Dr. M. T. Roy president of the council, is chairman.

## Prince Buys Sixth Plane

Newest Machine Has Armchair Seats For Passengers

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon, built with a maximum speed of about 130 m.p.h.

It is a biplane with six arm-chair seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The arm chairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The plane is two-engined with 200 h.p. It is finished like all the prince's planes, in the red and blue of the House of Windsor Flying Club.

First-lieutenant P. H. Fielden, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

## Egypt Building Big Dam

The British firm of Messrs J. W. Gibson, has been awarded by the Egyptian Government the big contract of building the Gebel Avela dam, a few miles south of Khartoum. Their tender was for \$10,390,430. Four firms, all British, tendered for the contract. It is estimated that the building of this dam will increase Egypt's cultivated area by 260,000 acres, and will take four years.

FOR MATRONS OR YOUNGER WOMEN WHO FEEL THEY CAN SUPPORT SLIM-MING LINES

Here's a slapping Paris model you can make at just the cost of the material.

It is a dress you can wear and wear and always look smart. It is a black and white conservative checked soft crinkly crepe knit. It depends entirely on its lines for its smartness. It needs no further adornment.

It has the slimming wrapped bodice and interesting curved hip meaning to lengthen the silhouette. The sleeves not too full, puff just above the wrists which give a certain grace to the hands.

Printed of plain crepe silk are equally smart to fashion it. Style No. 529 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44, and 46 inches bust. Size 36 needs 4 yards of 39-inch material. Price of pattern 20 cents in stamps or coin note, put just above the wrists which give a certain grace to the hands.

## Shined Thousands Of Shoes

Colored Man Has Been Railway Porter Forty-Six Years

In forty-six years of service as a porter at the union station of the Maine Central and the Boston and Maine railroads, in Portland, Moses Green, colored, figures he has put a bright gloss on approximately 671,000 shoes, and grinded for 355,000 customers.

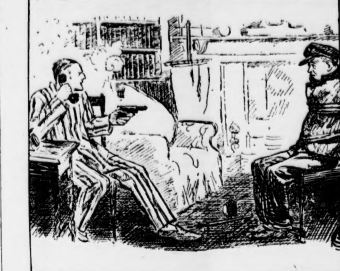

What's more, he figures that about \$126,000 worth of shoe leather has gone under his polishing cloth. He is known to travellers from all over the world who come to Maine for their vacations.

## Bad Times Man-Made

Dr. Beaumont, English poet, wrote in the seventeenth century "If we would rightly scan, it's not the times are bad, but man." His comment is still correct. Messes are mostly man-made. There is an occasional catastrophe brought by the forces of nature, but natural disasters do not measure in effect with man's economic, social, political blunders. We are tripped by our own stupidity. —Bronson Sin.

## Famous Liner Scraped

After considerable delay the liner "Baltic," once a renowned floating palace of the Atlantic service, is being scrapped in the ship-breaking yards at Osaka, Japan. The ship, which had been purchased at Junk price, arrived there last March, but before it could be towed into the harbor the shallow river bed had to be dredged to a depth of more than 19 feet.

HOUSEHOLDER: "And, as a lawyer, I can assure you that your sentence will be no light one."

INTRUDER: "I've got to 'and it to you, Guv'nor. You're a real smart feller. I suppose you wouldn't care for the job of defendin' me?"

## Old Document Found

Letter Written In 1876 Offered Judgship To Nova Scotia Senator

A letter in which Canada's second premier, Alexander Mackenzie, offered a judgeship to Senator William Miller of Arichat, N.S., in 1876, has been found and presented to the provincial archives.

Written in the premier's hand-writing, the letter reads: "My Dear Sir: We expect within a few days to make the several appointments to the county court in Nova Scotia as the local government desires to have the proclamation provided for by the statute."

"I write to request you to allow me to submit your name to his excellency for the Cape Breton district. 'Mr. Blake left for England three weeks ago, or he would have communicated with you on the subject. I know, however, that your nomination will be entirely satisfactory to him, and I have every reason to believe that will be general satisfaction in the district and in the province."

"I will feel greatly obliged by receiving your early answer, and remain, My Dear Sir, Yours Faithfully, A. Mackenzie."

## Heavy Tourist Travel

Indications That Visitors To National Park Will Equal Peak Year

OF 1929

Tourist travel in Canada's national parks this season has given indications of equalling in volume the peak year of 1929, according to information reaching Hon. T. G. Murphy, Minister of the Interior. The first day of July marked the opening of the season in most national parks, particularly in the Rocky Mountain region, and the number of visitors over the Dominion Day holiday is usually taken as an indication of what the season will produce.

At Banff national park in Alberta, all available accommodations were occupied on Dominion Day and many tourists slept in their cars it was reported.

These have been wonderful years for the type of young married people who are drawn closer by early struggle.

It's as simple as this. The nations must come to peace or go to pieces.

## IRISH DELEGATE REPROVED BY CONFERENCE CHAIRMAN

The shop assistant wrapped up the customer's parcel and deftly handed it to him.

"There you are, sir," he said, "and if the goods are not just to your liking we will cheerfully refund the cash."

Franklin Giles sniffed.

"Don't let me see such a yarn, young man," he replied.

"Er? What?" exclaimed the assistant, momentarily taken off his guard.

"Ye might give me my money back," said the farmer, "but 'tain't human nature to be cheerful about it."

It is estimated that there are nearly 125,000 kinds of flowering plants.

## SUNDAY SCHOOL LESSON

JULY 30

GIDDEON

Golden Text: "Jehovah is the strength of my life: Of whom shall I be afraid?" Psalm 71.

Lesson: Judges, Chapters 6-8.

Devotional Reading: Gen. 18-14.

## Explanations and Comments

The Faith-Hearted Deacon, verses 1-8.—Gideon and his band were to fight the Midianites under God's banner, and to God must be accorded the victory. Left they should boast of themselves, defeated the enemy, their numbers must be reduced. Gideon therefore directed all the camp. Possibly the men who had braggot most of what they would do to the Midianites were the very ones who were afraid when they stood on the height and looked at the encampment of the enemy spread along the opposite side of the valley.

The Crusaders who were the bold in the council-chamber were the first to cry, "Save our quit!" (Let him who can, save himself!)

When God made men for His work He chooses the hearts courageous. When the brave soldiers the martial hero, even one has observed, there are many in the Church who suddenly require an engagement that prevents their joining in the battle.

The force reduced to Three Hundred, verses 1-8.—The number of God's army looked well, but God took to auditing it: He audited the figures, and a most "nag-audit" (McNellie). Gideon brought his army to the river and there tested it further. All but three hundred "bowed down upon their knees to drink."

The Hebrew for this is said to mean strictly "to drink" by putting the hands in the water," as for example, a horse or an ox does. Three hundred whom carried the water to their mouths with their hands, "lapped it" with their tongues, as a dog lapped, and they were the men chosen to fight.

## Russia Spoiled Plans Of Finnish Aviator

Flier Was Not Allowed To Go Up East Coast

Bronzed by sun and wind after 16,000 miles of flying which would have taken him more than half way around the world if it had not been for international complications. Captain Waino Bremer, young Finnish aviator, brought his monoplane to rest at the Ottawa air station. His Atlantic flight was cancelled.

Captain Bremer left Finland on May 1, intending to fly his small all-metal plane, which took him to Cape Town and back last year, around the world. After successfully navigating the route over Germany, Arabia, Persia, India and China, he finally arrived at Yokohama. From there he intended to fly to Vladivostok, in Siberia, and so on to Nome, Alaska.

However, Russian officials refused to allow him to fly up the east coast so he was forced to ship his plane to San Francisco from whence he flew to Ottawa.

Chinese Fighting Planes

Three thousand fighting aeroplanes will be placed in service in the next three years by the Chinese National Government, General Chih Sun Chow, Chinese commander-in-chief of the navies, announced. General Chih said he was examining various types of planes in the United States.

If you print any more jokes against Aberdeen I shall cease borrowing your paper," writes a man from Scotland.

## Fine Piece Of Legislation

Special Permission Required To Carry Firearms In Canada

One of the finest pieces of legislation that have been passed in many years is now in force, and heretofore no one in Canada is permitted to carry firearms without special permission.

We are fairly clear of the Southern European habit of carrying knives, but the very bad habit of carrying guns, revolvers and other forms of pistols, automatics, etc., has crept over from the United States and lends itself to fatal results in many cases. We are therefore properly confined to the good old British weapons of the fists, would be comparatively harmless.

Foreigners from the less civilized parts of the world, seem to think that guns are necessary in Canada, but such is not the case, and most of us can go through life without ever seeing one of these weapons, and certainly without having to use one. When it is widely known that guns are no longer lawful, and those who carry them are liable to suspension, it will be better for all concerned. Even thieves and burglars do not need guns. They are not used in Ireland, and in the United States, where criminals, and the police do not need therefore to use either,—Hamilton Herald.

## Canadian Landscapes

Exhibition Of Water Colors Shown In England

London's gallery-goers are showing keen interest in an exhibition of water colors of Canadian objects of scenic beauty, being shown at the Graham Gallery in New Bond Street by Miss Mary Harper, of the Overseas League. Queen Mary, among those who have attended the show.

Mrs. Harper, great admirer of Canadian landscape, has selected scenes as far north as Hudson Bay and includes in the present exhibition waterfalls done at Hudson, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Trees, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River," "Northern Ontario," "The Lions, Vancouver," "Grouse Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment. Her show contains also pictures painted in New York and in the West Indies.

## An African Supper

Native Beliefs Should Be Respected Over Fire

One of the most peculiar tribal customs among natives of darkest Africa, is the superstition that a baby must be held over the smoke of a camp fire in order to make it "pure" and such a baby must not associate with anything which was not "smoked" as an infant.

Such was the report of Miss Ruth C. Cowles, R.N., at Johannesburg, South Africa, a nurse of the American Board of Commissioners for Foreign Missions. She is a native of New Hampshire, and her parents live in Alabama, California.

"But we are gradually proving," Miss Cowles writes, "that such superstitions are groundless, and that tets, smoked or unsmoked, are safe in the hands of our native Christian nurses."

## A Mystery

Safe Stolen Two Years Ago Is Found On Prairie

Believed to be the same safe stolen from Harrowsmith, Sask., two years ago, a safe was "blown" on prairie land, near the Black Hawk mine at Blentfort, over the week-end, according to word reaching R.C.M.P. headquarters at Regina. There was nothing in or about the safe.

During the two years elapsed since the Harrowsmith safe was stolen, no trace of it was found. Mounted police are working on the theory that those responsible for the theft secreted the safe on the prairie near the Blentfort mine where it was found and "blown" by a second gang over the week-end.

## Exhibit Draws Crowds

Canada's exhibit at the Century of Progress Exposition, Chicago, is drawing a daily attendance of approximately 150,000 persons, according to information reaching the Department of Trade and Commerce. This number represents about 15 per cent. of the total daily attendance at the exposition.

A sensation was caused in the economic commission of the World Economic Conference when Hendryk Colijn, Dutch Prime Minister and chairman of the commission stopped Joseph Connolly, Irish Delegate, from speaking. Mr. Connolly (above inset) was supporting the Soviet proposal for an economic treaty and began an attack on Great Britain's economic actions against the Irish Free State. Premier Colijn interrupted to advise Mr. Connolly not to stray from the subject under discussion and the Irish delegate sat down. Our main picture shows Mr. Colijn indicated by arrow.

Rev. Wm. McNichol held a large baptismal service at the home of Mr. and Mrs. L. L. Hart on Tuesday night, when eight children were baptised into the church.

Hot, dry weather has been the order of the day. On Tuesday and Wednesday the temperature has ranged over one hundred in the shade.

Mrs. John Wolf and children, who have been staying with Mr. and Mrs. John J. Neher for a few days, have returned to their home in Carbon.

Mr. and Mrs. R. F. Torrance and Len Hart returned on Monday from a week's holiday spent at Banff and other points.

G. H. Nash and Percy Edwards, who

both underwent an operation in the Holy Cross Hospital, Calgary, last week, are reported to be getting along splendidly and they expect to return home next week.

Mr. and Mrs. T. J. Johnson and family returned home on Monday from a couple of weeks' holiday spent at Springs Lake. They report plenty of rain in that part of the province and excellent crops.

Mr. and Mrs. W. Poxon and Mrs. E. Poxon were Calgary visitors on Tuesday.

Mr. and Mrs. E. Bettcher, Mr. and Mrs. Art Neher, Mrs. Ted Neher and Mrs. John Wolf and young son motored

to Leduc and Edmonton last week and returned on Monday.

Mr. and Mrs. Jim Pless and David returned last Friday from a three weeks' motor trip through the States and to the Pacific coast and Victoria. They report a wonderful trip and poor crops in the Southern Alberta and States points.

Miss Ruth Ramsey left on Saturday for Edmonton to resume her training at the Royal Alexandra hospital.

Girls from Carbon attending the C. O. I. T. district camp at Lake Chiniki are Wanda Poxon, Wanda Horton, Le. McIntyre, and Myrtle Livingston. Caroline Henderson of Drumheller also accompanied the Carbon group, who left here on Friday last.

Mrs. McQuade has returned from a visit with her sister at Edmonton.

Mr. and Mrs. John J. Neher and Elmer and Alice Wolf returned on Sunday night from a visit at Banff.

Mr. and Mrs. Sid Nelson and family are back from their holidays.

Rev. Wm. McNichol and Johnson Hart motored to Calgary on Monday Tuesday they returned and brought out Miss Grace English, who is visiting at the home of Mr. and Mrs. Hart.

**ONLY NATURE IS KINDER  
THAN THIS LAXATIVE**

Bitter does not help constipation but they are often too harsh—and always hard to take. There is a gentler way to restore normal elimination. Resall's is the original cholestylin phenolphthalein laxative—just as fast as candy. No cramping or irritation. Even if some corrective must be taken every day you'll find Resall's is the safe, safe, safe. Ask for them at McKibbin's Resall Drug Store. Tin of 60—50c.

Mr. and Mrs. S. J. Garrett and family returned on Wednesday from a couple of weeks holiday in the mountains.

Rev. and Mrs. L. D. Batchelor of Westlock were visitors in the district on Thursday.

Lawrence Poxon returned on Saturday night from a tour of over 500 miles with Percy Hewlett and his Coleridge. The trip included Edmonton and other northern points, and on this trip the girls were playing softball, and made a wonderful showing. The Red Line Line had a bus under charter to the manager, on this occasion.

Mr. Birch and family of Hanna took in the tennis tournament at Carbon on Sunday. Mrs. Birch had been visiting friends in town for a few days, but returned to Hanna Sunday evening with her husband and family. Miss Grace English returned to Hanna with them.

Born, on Wednesday, July 26, to Mr. and Mrs. Paul Stefan, a son, in the Drumheller hospital.

Misses Vera Poxon and Daphne Naah, and Cyril Oliphant and C. Preston left on Sunday for a week's holiday at Banff and other points.

Carl Moorhouse moved the Taylor family to Calgary on Thursday last.

Mr. and Mrs. Len Poxon and family returned on Wednesday from a holiday at Banff.

Mr. and Mrs. Clayton Hay and son, of Brockton arrived last week and are spending a couple of weeks here.

Mr. Hargrave was injured in the Oliphant mine last Friday. Particulars are being looked at the time, but we understand that the injuries were not of a serious nature.

Mr. H. Brule of Beaver Lodge, was visiting at the home of Mr. and Mrs. L. Poxon for a couple of days last week.

Rev. and Mrs. Iltman returned on Wednesday from a trip to the World's Fair at Chicago. They report many interesting features at the fair.

A. F. McKibbin, past president of the Alberta Pharmaceutical Association, left on Monday to attend the Dominion convention at Montreal. He will be away for about a month. During his absence Mr. Holston, of Olds will be looking after the dispensing of drugs.

Harry Poxon and Clarence Reid left on Sunday to spend a couple of weeks camping at Pine Lake.

Messrs. C. H. Naah and P. Edwards, who underwent operations in a Calgary hospital a couple of weeks ago, have returned home.

Mr. Joseph Matson and son, of Beattie, Washington, spent a few days at work on Monday to attend the Dominion convention at Montreal. He will be away for about a month. During his absence Mr. Holston, of Olds will be looking after the dispensing of drugs.

Cutting of coarse grains will commence shortly in the Carbon district. One or two farmers are already at work with the binder, and many more claim that stubble will be ready in a week or so.

A good shower visited the district on Friday and Monday night the weather clouded up for a 29-hour rain. The rain came at the opportune time and just when summerfall crops were filling and in need of moisture. As a result a much better yield will result and crops on summerfall will probably now average between 20 and 25 bushels to the acre.

**FAITHFUL NOSE CREEK  
CEASES TO FLOW THIS YEAR**

Old timers and settlers can tell of many hardships endured in the early days when making the trip from Calgary to Carbon, where they had to cross the Nose creek en route. Today the old creek is dry. The familiar trickle of water that has mandered down a low-lying valley north of Calgary since before the time immemorial has ceased to flow, the drought of 1932 finally quashing its diminutive stream. The springs which have kept it up for years are still spreading tiny pools in spots. Although fed mainly by the springs, the stream has at times risen to threatening levels in spring floods and there was a time when it was a stable creek.

First crossed by fords, the creek was honored with a bridge about the time that the Village of Carbon was incorporated, and later replaced by a wider and more substantial structure. At no time has it been known to carry out a bridge in floods, but several times it has threatened.

The creek has served a fertile valley since the time of the first pioneers. Those early settlers approved of the small valley with its stream fed eternally by springs and lack of flood danger. Their faith has been justified. In times of drought the stream has shrunk, but always has been able to keep the valley green.

The creek rises in the foothills north west of Calgary and strikes southeast to a point due north of Calgary, then meanders down south to the Bow river.

Policeman — You were doing sixty miles an hour, miss.

Brish Young Thing—Oh, isn't that splendid, I only learnt to drive yesterday.

Aunt Helen—So you took your first dancing lesson today. Did you find it hard, dear?

We Stephen—No, auntie; it's easy enough. All you have to do is keep turning around and wiping your feet.

Teacher—Here you see the skull of a chimpanzee, a very rare specimen. There are only two in the country—one in the national museum and I have the other one.

It's queer the way a horse eats, isn't it?

What do you mean?  
He eats heat without a bit in his mouth.

**CLASSIFIED ADS.**

CARBON SCHOOL DISTRICT FORMED IN 1906

(Continued from front page)

Brule as teacher. Finally the board decided that instead of building the four-roomed new school they would construct another building along the same plans as the first school, and this was done.

The coming of the railroad about that time brought many new settlers and with the growing of the town the school facilities became inadequate, but it was not until 1926 that the present brick school was built, the contract being awarded to D. F. McKinnon.

Since the building of this modern structure there has again been a considerable increase in attendance and it looks as if it will not be long before additional changes will have to be made to cope with the situation. No doubt, as time goes on, these matters will be dealt with.

Interesting Reflections  
In 1906, when the first school district was formed, the minute book was a small ledger about six by eight inches. The cash book was a ledger and one side of the page was used for receipts and the other for payments. To audit the books, the auditor added up one page and subtracted it from the total of the other, thus deriving a surplus or a deficit, whichever the case was. There were double checkers and squabbles were numerous over who was going to sit with each other. For punishment the boys were often compelled to sit with the girls.

Par different today. The books are numerous and are checked by the Department regularly. Each department of the school or village must be kept in a separate book. A certified auditor must audit the books. Only single seats are used in the school room and the teacher does not rule with a hickory pointer. Ask Mayor Garrett. He went to school in Carbon.
